Human Resource Manager

Micron Technology,
George Town, Penang,
Malaysia

Dear Sir/Mam

I'm pleased to write you today regarding my application for the IT MES Automation Engineer position on LinkedIn. I believe my qualifications and experience make me an ideal candidate for this job.

I am in final semester of Bachelor of Computer Science (Software Engineering) Hons and will be graduating by next month, February 2020. Throughout my last three years I have been learning many programming languages including java, c, c++, c#, python, sql etc. and gathered a wide range of problem-solving skills. Last year, I have done my internship at Big ledger Sdn. Bhd where I worked on Spring Boot framework using java language and developed several back-end API's. I worked on a team where we followed agile development methodology to develop our software. I have done my final year project where I used Laravel framework and developed a fund-raising online platform for students who are facing financial difficulties.

I'm a Certified Professional for Requirements Engineering (CPRE) Foundation Level by International Requirements Engineering Board (IREB) & Malaysian Software Testing Board (MSTB). This semester I have learnt software testing where I have done test plan, test design specification, test case specification, test procedure for Simon's Web Platform.

In addition, the greatest strength of mine is to learn new things and adapt into new environment easily. I have been in my top form throughout my degree life. I have a great communication skills and leadership skills as I served International students society last two years.

I believe a relationship with your company would be mutually beneficial, as I am seeking a challenging work environment where I can exercise my skills to the fullest extent. I look forward to hearing from you and would love to explain my skills further during an interview. Please find a detailed account of my skills and knowledge in the attached resume.

Sincerely,

Mosior Rahman
